

Pre Select Shipping Payment

DSS

1. Auto Select Shipping Payment for Magento 2 Overview

Auto Select Shipping Payment for Magento 2 extension is a simple solution to speed up customers' purchasing process by pre-filling a shipping method and a payment method on the checkout page. If chosen shipping/payment method is not available for certain items; then; another method is pre-selected based on the admins' configurations. Not only does Magento 2 Auto Select Shipping Payment support ordinary checkout but multi-address checkout as well.

2. How Does Auto Select Shipping Payment for Magento 2 Work?

Magento 2 Auto Select Shipping Payment extension consists of two easy-to-configure features. Let's get started following this navigation: Stores => Configuration => DSS COMMERCE => Pre-select Shipping/Payment

2.1 Auto Shipping Config

Auto Shipping Config

Enable [store view] Yes Version 1.0.3

Auto Select Shipping Method [store view] [flatrate] Fixed
Shipping method is automatically selected if existed.

Shipping Method Position [store view] First Method
If not existed, apply one of the available shipping methods based on its position.

Pre-select and load one Shipping Method based on its availability and configured position

- In **Enable**: Choose Yes to have **Auto Shipping Config** enabled on the websites; or No to disable this feature.
- In **Auto Select Shipping Method**: Admins can pick a given shipping method to be automatically filled.
- In **Shipping Method Position**: If the shipping method auto-selected above is not available, one of three following options is applied.

Shipping Method Position [store view]

- First Method
- None
- Last Method
- First Method

- **None:** Shipping Method is under customers' decision as the default Magento 2.
- **Last Method:** Auto-apply the last shipping method on the checkout page.
- **First Method:** Auto-apply the first shipping method on the checkout page.

2.2 Auto Payment Config

Auto Payment Config
